### Best Practices

Best Practice No. 1:

One of the objectives of our college is “Expansion and extension of higher education among the students, especially girls of the weaker section of the rural society in the area of Karvir, Panhala, and Gaganbavada Talukas. The College was established with the noble aim of disseminating higher education to the students in general and the girl students in particular. Earlier there was no college education facility available in the hilly and remote area. The boy students who could afford higher education used to go to Kolhapur City. The girls had no opportunity as their parents would marry them off. Thus a large population of girl students was deprived of taking higher education. So the founders of the Sanstha and the then trustees established this college with a fixed and particular objective in their mind and it was educating girls. To fulfill this objective, the members of faculty and staff try their level best since the beginning of the college. After the declaration of HSC results, they personally visit the adjoining Junior colleges in order to collect the list of the pass students. Then the members of the faculty make their village-wise and faculty-wise lists and dividing themselves among the groups, plan door-to-door visit schedule. By visiting the wards and their parents, they request them to seek admission in the college. They provide college prospectus and inform them about the available courses in the college. Through this interaction, inputs regarding the courses, co-curricular, extra-curricular activities as well as various facilities are given to the prospective students and their parents. A special emphasis is given for the admission of the girl students. Many of the girl students do not afford the higher education since they belong to the poor agrarian families. So with a view to bring those into the current of higher education, the authorities provide them free-ships, concession in admission fees, examination fees, book-bank facility, money for commuting to college etc. Special short term courses are organized that offer the girl students an opportunity to join them and develop their inherent skills e.g. Fashion Designing Course, Mehendi Painting Course, Modern Cookery Course, Making Paper and Clothes Bag Course, Photography Skill Course, Modi Lipi Course etc. As a result, the admission of the girl students to boy students is outnumbering each year.

In the year 2019-20, there were 326 boy students and 536 Girls students out of the total number 862 students. In the year 2020-21, there are 254 boy students and 536 Girls students out of the total number 790 students.

Best Practice No. 2: College has one Aided and one Unaided division.

1. The fees for the students of Aided division ranges from Rs. 575 to Rs. 690
2. The fees for the students of Unaided division ranges from Rs. 2500 to Rs.4000
3. The College charges fees to the students of Unaided division as per the fees of Aided division.
4. The free ship given per student of Unaided division ranges from Rs.1810 to Rs.2275.
5. This is the best Practices only conducted in our institute. The other colleges in the adjoining area having Unaided divisions, they never offer such type of free ships to the students.
6. Evidence of the Success: Details of the Free-ships given to the students. Total free ship given in the year 2019-2020 for B.A.I 1810 x125 2,26,250.00/- for B.A.II 2275x2659,150.00 and for B. A. III 00. For B. Com. I 1810x3257,920/-, for B. Com. II 00. and for B.Com. III 00. The total amount for B.A. 2, 85,400.00/- and for 59,150.00 which comes to Grand total free-ship given in the 2019-20 is Rs.3, 43,320.00/-. In the year 2019-2020 total 183 students were benefited. These students are from economically weaker sections. Out of these students 62 percentage are girl students.
